## **DETAILED ACTION**

### ***Claim Objections***

1. The claims are objected to because they include reference characters which are not enclosed within parentheses.

Reference characters corresponding to elements recited in the detailed description of the drawings and used in conjunction with the recitation of the same element or group of elements in the claims should be enclosed within parentheses so as to avoid confusion with other numbers or characters which may appear in the claims. See MPEP § 608.01(m).

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bhattacharya et al. (U.S. patent # 5,465,203) in combination with Paterson et al. (U.S. Patent # 4,053,820) and Marsh (U.S. Patent # 5,227,962).

Art Unit: 2838

Bhattacharya et al. disclose the claimed invention an active filter (figure 1 and 7-11), including an active filter (figure 1, item 22,24,26 and 28), a transformer (figure 1, item 42), a voltage source converter (figure 1, item 34), a control unit (figure 7, item 70), semiconductor device, (figure 1, item 38). However Bhattacharya et al. does not disclose the utilization of the technique for the filter to remove 11<sup>th</sup> and 13<sup>th</sup> harmonic and a switch unit. Peterson et al. teaches the utilization of the similar technique for the filter to remove 11<sup>th</sup> and 13<sup>th</sup> harmonic (figure 9, item 60) and Marsh teaches the utilization of similar technique for switch unit (figure 3-7). It would have been obvious one having an ordinary skill in the art at the time the invention was made to Bhattacharya et al.'s invention by utilizing the technique taught by Paterson et al. and marsh for the purpose of improve the efficiency of the active filter.
